A. Program Description

Overview
This solicitation is seeking applications to assess state compensation programs, develop an implementation plan based on the assessment, and execute the implementation plan. This project will support selected states in assessing victims’ access to compensation programs and implementing recommendations with the goal of increasing the number of victims aware of this vital resource and interested in seeking victim compensation.

Statutory Authority: This program is authorized by VOCA, 34 U.S.C. § 20103(c)(1)(a).

Project-Specific Information
Under the Crime Victim Compensation Program Assessment project, funding will be provided to conduct three phases of this program. First, each selected state will assess its compensation program. Selected applicants will conduct an assessment to identify gaps in a state’s compensation program, policies, and procedures regarding victims’ access to compensation. This should include an analysis of applicable rules, regulations, statutes, and other relevant standards or policies providing guidance for the state’s compensation program. The assessment will include recommendations about how to enhance state compensation programs, including evidence-based strategies and recommended organizational practices and policies in the administration of crime victim compensation programs at the state level.

Second, selected states will develop an implementation plan based on the needs identified in the assessment. This plan will set forth how states will respond to those needs and strategies for implementation. This should include identifying government and community-based partners necessary to improve victim access to compensation funding, and how states will include those partners. Selected applicants will generate model recommendations and promising practices for their states that may be replicated in other states or territories in the future.

Third, selected states will execute the implementation plan of recommendations identified during the first two phases that will result in enhanced victim access to compensation funding. During this final phase, states will be expected to act on the recommendations identified in the assessment and follow the strategies for execution identified in the implementation plan.

Goals, Objectives, and Deliverables
The goal of this project is to develop or enhance and implement evidence-based strategies, and organizational practices and policies, to increase program responsiveness, efficiency, and accessibility for all victims throughout the state.

Selected states will achieve this goal through the following objectives:

- Conduct an assessment of the state’s current compensation program, including applicable rules, regulations, statutes, and other relevant standards impacting the ability of victims to access compensation, along with an analysis of the different federal, state,
local, and other funding streams and programs that support victims (this can include, but should not be limited to, restitution collection). This should also include an assessment of the compensation program’s efforts to coordinate, collaborate, conduct outreach, and partner with other government agencies, nonprofit organizations, and other professional organizations;

- Generate model recommendations and promising practices that can be implemented within their own state, and, if rooted in evidence-based practices, possibly across the country;
- Develop analysis of the different federal, state, local, and other funding streams and programs that support victims;
- Examine if and how restitution impacts state compensation programming, including the effectiveness of restitution collection efforts in their states;
- Develop an implementation plan based on the assessment that strives to produce a more efficient and responsive compensation program, while increasing crime victim access to compensation funding; and
- Implement the recommendations that will result in enhanced victim access to compensation funding.

Deliverables:
- A needs assessment conducted of the state’s compensation program (as described in the goals, objectives, and deliverables). The needs assessment should include recommendations to address the issues identified in the needs assessment.
- An implementation plan to execute the recommendations identified in the needs assessment. The implementation plan should include model recommendations or promising practices that can be shared with other states that describe the policies, procedures, protocols, and resources (such as technology, staffing, and outreach activities) required for implementation. The implementation plan should also include a time-task plan for executing the recommendations.
- Execution of recommended activities that are allowable and can be accomplished during the award period.
- A report assessing the execution of the implementation plan, which should include, but not be limited to, a discussion of (a) successes and challenges of implementation; (b) the sustainability of newly implemented successful measures without federal funds; (c) partnerships and outreach efforts to expand victim access to compensation; (d) new or expanded initiatives to improve the compensation programs, and the effectiveness of these initiatives; and (e) recommendations for future efforts to improve or enhance compensation programming.

The Goals, Objectives, and Deliverables are directly related to the performance measures that demonstrate the results of the work completed, as discussed under What an Application Should Include.

Evidence-Based Programs or Practices
OJP strongly emphasizes the use of data and evidence in policy making and program development in criminal justice, juvenile justice, and crime victim services. For additional information and resources on evidence-based programs or practices, see the OJP Grant Application Resource Guide.
