

Monitors' Feedback Sheet

Your perspective is essential to our goal of providing training that is inclusive and respectful of the victim/survivor experience. To that end, please use the questions below to guide your feedback. Because this 2-day session has multiple sections, you will not be able to fit all your answers in the spaces below. Please use the questions as a guide while you monitor each section, and write your answers on a separate sheet of paper. If you have additional comments, feel free to add them. Thank you for your commitment and cooperation.

Does this section present the point of view of the victim/survivor? If so, is the presentation respectful? Is it accurate?

Are there topics you think are a priority for you that need to be discussed in a different order? Are there topics you wish had been included?

When you listened to the participants process the day, what was said that you would want addressed differently?

Check in later to see if you think the trainers are consistent throughout the day.
